SUMMARY

DevOps Engineer with **3 years and 6 months of experience**, including **3 years in Terraform** and **6 months in AWS administration**. Skilled in automating and managing AWS infrastructure using Terraform, GitHub, and CI/CD tools across multi-environment setups. Adept at designing scalable, secure, and compliant cloud architectures, and collaborating across teams using Agile methodologies.

Skills And Certifications

Primary Skillsets	Secondary Skillsets
• Cloud Infrastructure: AWS • Infrastructure as Code: Terraform • Monitoring & Logging: AWS CloudWatch, CloudTrail • Incident & Change Management: ServiceNow • Communication: Client Interaction, Infra Team Collaboration	• Version Control: GitHub • Configuration Management: Ansible • CI/CD Tools: Jenkins • Scripting Language: Groovy Scripting • Collaboration Tools: Jira, Confluence, ServiceNow • Containerization & Orchestration: Docker, Kubernetes
Certification: • AWS Certified Cloud Practitioner • AWS Certified Solutions Architect – Associate	

Professional Experience

Cognizant Technology Solutions	Feb 2022 – Present
Project 1: AWS Administrator • Created and managed IAM users, groups, and roles with appropriate IAM policies based on team roles. • Administered S3 buckets with lifecycle policies, versioning, encryption, and access control. • Performed EC2 instance modifications including resizing, security group updates, and EBS volume management. • Integrated CloudWatch alarms and CloudTrail logs for monitoring and auditing. • Participated in incident resolution and change management using ServiceNow.	Duration – 6 Months
Project 2: Terraform Engineer – Infrastructure as Code Automation • Designed, maintained, and supported AWS infrastructure using Terraform across multiple environments. • Developed reusable Terraform modules for EC2, VPC, IAM, RDS, and EBS provisioning. • Managed Terraform remote state using S3 and DynamoDB with locking and versioning. • Implemented infrastructure changes like EC2 resizing, security group updates, and EBS volume modifications. • Used Terraform workspaces to isolate environment-specific configurations. • Integrated CloudWatch alarms and CloudTrail auditing into Terraform workflows. • Followed GitOps practices using GitHub for version control, branching, and code reviews. • Participated in incident resolution, change management, and compliance audits. • Documented Terraform workflows and supported onboarding of new team members. • Coordinated with Jenkins and Ansible teams to design CI/CD workflows and gained hands-on experience in pipeline management. • Worked in Agile methodology using Jira for sprint planning, task tracking, and team collaboration.	Duration – 3 Year

EDUCATION

- Bachelor of Engineering (B.E.) – 2021
- Higher Secondary Certificate (HSC) – 2017
- Secondary School Certificate (SSC) – 2015
